Acculan 3Ti dermatome

Look. Feel. Experience.

Aesculap is one of the leading suppliers of motor systems. Our objective is to provide you with instruments upon which you can depend. Driven by this objective, we rely on the most innovative technologies and the highest-quality materials in the development of our systems.

With the new Acculan 3Ti dermatome, Aesculap has set a new milestone – the most modern drive technology in a robust titanium housing combined with extensively proven non-sterile battery technology – a dermatome you can rely on.

The difference
is in the detail.

The difference is in the detail – Acculan 3Ti avoids sterilization not only of the temperature-sensitive battery cells, but also of the equally vulnerable control electronics by integrating it in the battery unit.

A concept which offers you the reliability that you expect and also spares your budget.

Acculan 3Ti dermatome at a glance

■ Acculan 3Ti dermatome GA670

The best dermatome ever from Aesculap. More performance and reliability thanks to the patented motor technology – an instrument you can rely on.

Due to its titanium housing, this dermatome is suitable for use in conjunction with the Eccos storage system for machine reprocessing using alkaline cleaning agents and disinfectants.

- Quick and simple blade changes
- Cutting width max. 78 mm, adjustable by 10 flaps of width 8 mm
- 0.2 – 1.2 mm cutting thickness in 1/10 mm steps, keyless adjustment
